

DON'T JUST TAKE OUR WORD FOR IT

TESTIMONALS

Fay Fretton Equine physiotherapist

"The impression pad is an invaluable tool & I would strongly recommend that every rider uses one to establish whether the saddle is distributing the riders' weight evenly over the horses back. Uneven pressure will affect the way the horse goes & will invariably lead to performance or behavioral problems"

Kate Boe – McTimoney- Corley Animal Manipulation & Equine Sports Massage Therapist

"If a horse is showing changes in behaviour or way of going I would highly recommend using the Port Lewis Pad to rule out the saddle as the cause of the problem."

Matt Hick Dressage rider

"It was so easy : I was able to check the fit of all my horses in one week, with some surprising results"

The Impression Pad, when placed under a saddle, will give an accurate visual record of how the weight is distributed through the panels to the horse. You will have an exact impression of how that saddle fits that horse, with that rider. It offers a quick and easy way for the rider to regularly assess the fit of their saddle.

It is then up to you to find a reputable saddle fitter when required to advise you on the best course of action

Remember if you buy a horse it is your responsibility to ensure its wellbeing. A correctly fitted saddle is as important as having your horse correctly trimmed or shod.

DOES YOUR SADDLE FIT?

The impression pad takes the mystery out of saddle fitting for all concerned owners or riders

IS YOUR HORSE MISBEHAVING?

Often changes in behaviour are early warning signs that your horse is uncomfortable or in pain.

Early warning signs can be:

**Difficult to tack up
Refusing to stand when mounted
Short choppy stride
Problems going straight**

This can lead to:

Bucking

Rearing

White hairs on the spine

SADDLE FITTING ASSESSMENT

Saddle fitting assessment takes approximately one hour.

The impression pad is placed under your saddle . You will then need to ride in walk, trot and canter for thirty minutes to make a clear impression.

The saddle is then removed and a thorough observation of the pad is made.

BENIFITS OF HAVING A SADDLE ASSESSMENT

A horse free of discomfort and pain

A horse that can work to maximum efficiency and progress in his training

A well behaved and balanced horse

Peace of mind regarding the welfare of your horse
